Decision Support International (DSI)

... Who we are ...

DSI is a Singapore based consultant group providing analytic decision-support services. We deliver policy assessments and strategic evaluations to bilateral and multilateral donor agencies, and government ministries. DSI services are specifically designed to support systematic decision-making processes that help clients identify, monitor and meet their strategic goals. DSI applies the effective use of simulations and system outcomes to set strategies for planning and development. We have a unique understanding of developing economies and use integrated computerized instrumentation for meso- and macro-economic analysis and scenario simulations. Once goals and enabling policies are envisioned, our expert consultant team can present alternative strategies and sensible solutions to achieve critical objectives.
